

Extend BYOD to the whole room

INTRODUCING JABRA REACH

BYOD should be effortless from every seat at the table. But in many meeting rooms, overcoming the distance from the video bar can result in poor workarounds, cable clutter and an unreliable user experience. Jabra Reach is a single-cable BYOD extension accessory that solves all that. Compatible with all Jabra video solutions, it's designed to deliver cleaner installs, simpler management and seamless Plug & Play with every device, in every room, every time.

BYOD EXTENSION

In BYOD rooms with PanaCast video bars, Jabra Reach extends BYOD to every seat at the table. Users simply connect a single USB-C cable to their laptop for instant access to room audio, video, screen sharing and optional charging. No guesswork, no drivers, no “*Why isn’t this working?*” Just plug-and-play. Pure and simple.

BYOD PASSTHROUGH

In Android-based rooms with PanaCast video bars configured for Microsoft Teams Rooms on Android or Zoom Rooms, Jabra Reach lets hosts choose how they share. Present content through your Microsoft Teams or Zoom meeting. Or leverage the room’s peripherals for a BYOD session.

WHY YOU’LL LOVE IT

-  **Cleaner installs:** Replace adapters, extenders and cable clutter with one simple solution
-  **Faster deployment:** Standardized components simplify installation across room types
-  **Reliable performance:** Purpose-built for larger rooms where a lossless connection matters
-  **Simplified management:** Monitor and update rooms through Jabra Plus Management
-  **Reduced maintenance:** A simple, reliable setup means fewer day-to-day tickets

WHY YOUR USERS WILL LOVE IT

-  **Effortless BYOD:** Users simply connect their laptop with a single USB-C cable
-  **Consistent reliability:** Lossless video, audio and content sharing goes without a hitch
-  **Instant starts:** No adapters, drivers or guesswork. Just instant connection
-  **High confidence:** Predictable effortless experiences with every device, every time

BUILT FOR JABRA SOLUTIONS
