

Smart ideas for the bigger picture.

celexon - your specialist
for home cinema and AV solutions

PRODUCT DESCRIPTION

With the celexon active loudspeaker set, smaller rooms such as meeting rooms, classrooms or similar can have impressive audio.

Thanks to an active and a passive device, the loudspeaker set can be connected directly to an audio source without further amplifiers. For this purpose, either a screw terminal or a 2-pin RCA input are available. Audio signals are reproduced powerfully, dynamically and without distortion with an RMS power of 2x30W and a frequency range of 20Hz - 20,000Hz.

active loudspeaker 525-B
