TechStation

With an HDMI port and multiple ways to connect your devices, the TechStation superpowers your projector and enables more effective learning by working seamlessly with the tools you already use. After connecting your device, close up the TechStation's lid to create a streamlined, all-in-one solution for streaming audio and video.

Brighter, Sharper Images in Any Light

With 4,500 lumens, amazing 28,500:1 contrast ratio, and available 1080p HD, the IN2130 Series projects sharper, clearer images no matter the lighting in your office or conference room. Plus BrilliantColorTM DLP imaging technology ensures images shine with over 1 billion colours that ensure life-life colour accuracy and eye-catching presentations.

Special Features

- Quad Image Shift: Adjust your image both horizontally and vertically to get it right where you need it on the screen.

- Four Side Edge Masking- Easily crop out unwanted encoding noise on the edge of video signals so only the content you want is displayed.

- Digital Image Magnification: Fit your image to your screen and enlarge content so all the audience can clearly see it.

- RGBCMY Professional Color Adjustment: Personalize and perfect the image to your content and your setting by adjusting primary and secondary colors.

More Ways to Connect and Control

InFocus ProjectorNet 4.1 software lets you remotely manage and support your projector from a single computer via your existing network. Or quickly connect IN2130 Series projectors to your internal network for easy remote management. You can also simply sync with Crestron Roomview or AMX Device Discovery.

Superior Lens Performance

IN2130 Series projectors offer high quality optics with 1.3x zoom ratio, clear focus, and high resolution with available full HD. The projectors deliver a longer throw, so you have more flexibility on where to mount them.
