

celexon Electric Professional Plus V2.0 Battery Projector Screen

DESCRIPTION:

The celexon Battery Screen V2.0 Motor Professional Plus offers maximum flexibility for conference rooms, training environments and home cinemas – all without a fixed power connection.

no Plug | just Play – Thanks to the integrated lithium battery, the screen allows up to 500* up and down cycles per charge. Ideal for rooms without direct power supply where no permanent wiring is desired.

The stylish, powder-coated aluminium housing blends discreetly into any room design and impresses with its clean lines. The flush-finished weight bar not only ensures a smooth fabric lay but also emphasizes the well-thought-out design approach of the entire Professional Plus series.

The durable and quiet tube motor with integrated RF remote control enables convenient operation from a distance. Optional accessories such as a 12V trigger or wall switch are available on request. The high-quality projection fabric with black backing and black masking delivers excellent contrast and is suitable for both traditional projectors and modern laser projectors.

KEY INFORMATION:

- Available in 4:3 and 16:9 formats
- Gain factor 1.1
- Wide viewing angle of 155°
- Black masking and black drop for maximum image contrast
- Light-blocking black backing
- High-quality PVC fabric with fine texture - ideal for 4K
- Projection fabric type D (diffuse reflective), matte white
- Dimensionally stable snail-drive roller for perfect flatness
