## Highlights:

- Multi-functional wall bracket allowing swiveling and downtilting
- Slimline aluminum design
- $12 \times 2$ " high-quality broadband speakers
- Multi-tapping 70V / 100 V line transformer

The KYRA12 design column speaker consists of $12 \times 2^{\prime \prime}$ highquality aluminum cone full-range drivers, delivering extraordinary clarity and detailed sound. The overall continuous power handling reaches 120 Watt and the beamwidth of $174^{\circ} \times$ $9^{\circ}(-6 \mathrm{~dB} \text { avg } 1 \mathrm{kHz}-4 \mathrm{kHz})^{*}$ makes it the perfect match for acoustically difficult venues, reducing echo and microphone feedback which optimizes the speech intelligibility in reverberant venues.

A multi-tapping line transformer allows it to be connected to 70V/100V public address systems with different power taps for 40W, 20W and 10W and/or low impedance (12 ) systems.**
*Given dispersion values are the average beamwidth within the $1 \mathrm{kHz}-4 \mathrm{kHz}$ frequency range ( $-6 \mathrm{~dB}-1 / 3 \mathrm{oct}$ ), which are critical for the speech intelligibility in the main application field of these loudspeakers.
**Due to an optimized calibration, the KYRA12, compared to its predecessor the AXIR, will have a standard low impedance of 12 ohms instead of 6 ohms.

Applications:

- Education
- Corporate spaces
- Houses of worship
- Public facilities
- Events

## Product Features:

| Front finish | Steel grill |
| :--- | :--- |
| Construction | Aluminium with plastic side covers |
| Dimensions | $70 \times 1006 \times 101 \mathrm{~mm}(\mathrm{~W} \times \mathrm{H} \times \mathrm{D})$ |
| Colours | Black (KYRA12/B - RAL9005) |
|  | White (KYRA12/W - RAL9003) |
| Accessories | 2-way Revolving mounting bracket |
|  | $1 \times 3$-pin Euro Terminal Block Input connectors |

- KYRA12/B - Black version
- KYRA12/W - White version

## Architects' and Engineers' Specifications:

The loudspeaker must be a surface-mount column type, consisting of $12 \times 2^{\prime \prime}$ aluminum cone full-range drivers, which are fitted inside a slim and elegant designed enclosure.

It shall be fitted with a multi-tapping line transformer allowing the speaker for being used in 70/100V public address systems or standard low impedance $(12 \Omega)$ audio systems. It must have an RMS power handling of 60 Watt with a maximum power handling of 120 Watt and the frequency response ( $\pm 3 \mathrm{~dB}$ ) should range from 150 Hz to 20 kHz . The sensitivity must reach 92 dB when measured with an input signal of 1 Watt at a distance of 1 meter, while a maximum continuous sound pressure level of 113 dB should be reached. The nominal dispersion shall be a $260^{\circ}$ horizontal and $90^{\circ}$ vertical coverage pattern at -6dB (average $100 \mathrm{~Hz}-10 \mathrm{kHz}$ ).

The line transformer power taps shall be selectable through a rotary selector switch on the rear side of the speaker and adjustable in steps of 40W, 20W and 10W for 70/100V (a 5W tapping is available for 70 V use). Fast and reliable connections shall be possible through a 3-pin terminal block connector.

The speakers' enclosure shall be constructed of high-quality aluminum materials with a fine perforated steel grill front finishing which comes available in both white (RAL9003) and black (RAL9005) colors. Optimal directional placement shall be possible through the included multi-functional wall bracket allowing side swivelling over a range of $0^{\circ}$ to $42^{\circ}$ in both directions and down tilting with an angle up to $13^{\circ}$. The speakers' enclosure shall be 1008 mm high, 70 mm wide and 147 mm deep (including the height of the mounting bracket) and the weight shall not exceed 4.3 Kg .
