Key features

1800R Curvature: Samsung 1800R monitors fit precisely into the human field of view for a more comfortable viewing experience. Reading text, selecting cells, watching videos, and looking at multiple images are easier and less straining than before. TÜV Rheinland validated Samsung's curved monitors for reduced picture distortion.

USB Type-C: Connect everything, create anything. USB-C provides up to 90W power delivery for fast charging, high-speed data transfer, video signals and more. All from one cable.

USB hub: USB hub monitor will remove numerous cords from our desk. Instead of connecting peripherals to your PC, you can connect them to the monitor, which then connects to your PC over USB.

Wide color gamut & VESA DisplayHDR 400:

A richer color reproduction for lifelike images, 1 billion colors for color accuracy and deep blacks with bright whites with HDR, for the most vibrant color ever.

All tests and measurements were conducted by Samsung internally.

¹Based on internal testing data of S80PB, S80TB and T45F monitors only. Testing compared energy usage of these models with Eco Saving Plus mode switched on high setting and switched off. Actual energy savings may vary based on usage conditions, brightness levels, and model selected. Eco Saving Plus is not available in Dynamic Contrast Mode, Game Mode, Eye Saver Mode, or when PIP/PBP Mode is on.
