

SUPERIOR

The Bigger – The Better (90–130") with Trichroma Laser Technology

Trichroma PX2-Pro 90"-130"

Trichroma Laser TV

With the unique Trichroma Laser technology, the RGB primary colors are generated using separate lasers, which results in outstanding color representation. The highest color space standard of the Hisense Laser TVs reaches up to 107 percent of the BT2020 color space.

Detailed images in 4K Ultra HD

Four times as sharp as Full HD: ultra-fine details in 4K Ultra HD enable sharp images with outstanding depth, smooth movements and high-contrast, vivid details.

25000+ hours Entertainment

Premium X-Fusion technology uses precise light sources to ensure 25,000+ hours of entertainment which is the equivalent of approximately 10,000 movies (2 hours per movie) for long-lasting viewing pleasure.

90"-130" Projection

The ultra short throw projector produces brilliant and bright 4K images up to a flexible size of 90" -130" inches for a large-inch TV experience. (Screen not included).

Enjoy intelligent enter- tainment with VIDAA U6

The customizable user interface VIDAA U allows you to arrange your favorite apps individually and access them in a flash. More flexibility, more individuality. Endless searching and scrolling are a thing of the past.

(*Content may incur costs.)

Dolby Atmos

Immerse yourself in the action and be surrounded by powerful sound. With Dolby Atmos support and 30W output power, the TV can simulate the effect that the sound comes not only from the front and below, but also from above: for an all-round perfect sound experience.
